

Succeeding in Value-Based Care

ACP New Jersey Chapter is sponsoring a value-based care symposium designed to help primary care physicians practice effectively in the new world of value-based care. This half-day program on Saturday, March 23, 2019 at the Princeton Marriott Forrester, is an opportunity you don't want to miss. Leave the session with tools to navigate the turbulent waters of today's practice. Primary care physicians in New Jersey can register for the ACP member rate of \$185.

Succeeding in Value-Based Care | Saturday, March 23, 2019 | Princeton Marriott Forrester | Registration fee: \$185

Agenda

- 7:30am Registration/Breakfast
- 8:00am **Primary Care's Role in Addressing Social Determinants of Health: Lessons from the Field | Dayna Fondell, MSN, RN**
This presentation will discuss the Camden Coalition's approach to working with individuals with complex health and social needs including the importance of addressing social barriers in the context of healthcare; some innovative strategies to address these barriers; and how primary care can play a role in this space
- 9:00am **Transitions of Care | Linda Thomas-Hemak, MD**
"Transitions of care" is the movement of patients between health care practitioners, settings, and home as their condition and care needs change. Unfortunately, these transitions do not always go smoothly. When that happens, the result can lead to adverse events, higher hospital readmission rates and increased costs. Dr. Thomas-Hemak has a passion for "Closing the Loop" and the leading role of medical homes in effective care coordination and transitions of care. Join Dr. Thomas-Hemak and discover the secrets to effective care transitions.
- 10:00am **Break and Networking with Speakers**
- 10:30am **Motivational Interviewing for Patients with Addiction: The Stages of Change | Kathy Pruzan, PsyD**
Motivational Interviewing is a collaborative conversation style for strengthening a person's own motivation and commitment to change. It addresses the common problem of ambivalence about change, elicit and explores the person's own reasons for change, and recognizes the patient's autonomy in the change process. Dr. Pruzan, the Director of Evaluations at the The Center for Motivation and Change, will lead a conversation about how you can incorporate motivational interviewing to help your patients face their addiction.
- 10:30 am **Clinical Coding Documentation and its Impact on Value-Based Payment | Connie Altman and Gregory Zorbas**
Hierarchical Condition Categories (HCCs) is critical to risk coding in value-based health care. This session will review how to accurately diagnose and code important conditions, such as depression and obesity, and will also cover examples of common HCC coding opportunities as they present clinically. By popular demand, Connie Altman and Gregory Zorbas return to lead this highly energetic session.
- 12:30pm Conference Concludes
